Hello.

I'm Francisco López CACHEDA, Passionate about Agility.

Over 20 years in technology and 8 guiding transformations across Banking, Insurance, Energy and Industry. Since 2025 I design and build the tools those transformations need —portfolio models, flow metrics, alerting systems— using generative AI and agentic systems as my working method.

Domain Expertise

Agile & Lean Mindset
Portfolio Management
Flow Metrics
Organisational Design
Applied AI & Agentic Systems
Strategic Facilitation

Languages

Spanish Native
English 4 / 10
Galician 4 / 10
Italian 4 / 10

Education

1992 - 1996

BSc in Computer Engineering

Instituto Universitario de Nuevas Profesiones

Courses & Certifications

Scrum.org

PSM I · PSM II · PSPO I · SPS · PAL I · PAL-EBM · PSK I · PSU I

Scaled Agile (SAFe 5)

Agilist (SA) · Product Owner/Product Manager (POPM) · DevOps Practitioner (SDP) · Lean Portfolio Management (LPM)

Kanban University

Team Kanban Practitioner (TKP) · Kanban Management Professional (KMP)

Leadership & Organisation

Management 3.0 · Sociocracy 3.0 · unFIX · Wardley Maps · OKR Lab · Lean Change Management · Digital Facilitator

AI & Data

Generative AI for Productivity and Agile Management (233 Academy) · ChatGPT Prompt Engineering (DeepLearning.AI) · Collaborative Writing and Coding with OpenAI Canvas (DeepLearning.AI) · Microsoft Fabric (6 modules, Microsoft Learn) · Google Antigravity

Business

Digital Entrepreneurship (ISDI)

25 certifications and 15 accredited courses listed on LinkedIn.

Strengths

Versatility
Dependability
Communication
Analytical Thinking

Tools

JIRA (REST API) · Confluence
Power BI · Power Query · Excel
SharePoint · Azure DevOps
Python · SQL · HTML/CSS/JS

Google AI Studio · Gemini
Miro · Mural · Google Workspace

Experience with Kairos DS

NOV 2018 - PRESENT

Strategic Agile Consultant - Kairos DS

I guide organisations through the design and rollout of their operating model: portfolio governance, measurement systems and leadership development. Since 2026 I also drive the internal group answering client demand around Artificial Intelligence.

MAY 2025 - PRESENT

Consumer Finance Bank

Portfolio · Flow Metrics · Product · Applied AI

- **Designed and rolled out the organisation's portfolio model**, articulating the chain Strategic Initiative → OPUS → Feature → Story. Authored the full lifecycle guide (Funnel, Initiate, Explore, Refine, Deliver & Measure, Close) with Definition of Ready/Done, WSJF prioritisation matrices and archetypes per phase; configured JIRA and Confluence and facilitated the first sessions with OPUS Owners.
- **Organisation-wide flow metrics dashboard**, continuously evolved to match the needs of each governance level.
- **Tribe-level metrics dashboard**: redesigned the data model architecture, cutting queries per refresh from ~65 to 2-3 and uncovering three calculation defects in the original model (time-window boundaries, issue reopening and threshold filtering). Results validated 63/63 against an independent Python implementation.
- **Alerting system for the Tribes' Squads**, deployed across 23 squads: PRD, technical architecture and two phases of epics, with incremental JIRA extraction, a Data Confidence Index and ceremony-contextual views for Scrum Masters and Product Owners.
- **Coached the Agile CoE** and its lead on the definition of the Strategic Transformation Plan.

MAR 2026

Payments Infrastructure (regulated entity)

OKR · Hoshin Kanri · Executive Facilitation

- Designed and prepared the executive session to **define the OKRs for the 6 strategic pillars** towards the 2028 vision, in an iterative 180-minute format that closes each pillar before opening the next.
- Produced the complete facilitation kit —introduction, techniques, materials and timing guides— designed so **anyone without prior agile facilitation experience** could run the dynamics, including handling difficult situations (dominant voice, project attachment, analysis paralysis).

DETAIL

APR 2026

Digital News Media

Agentic Systems · Product Operating System

- Internal collaboration on the **review and improvement of a client-defined agentic product operating system**, covering the Discovery → Inception → Design → PRD → Stories → Review pipeline with OKR → JTBD → PRD → Story traceability.
- Demonstrated the system to the client and its technical leadership.

MAR 2025

Central Bank

Inception Deck · Strategic Initiative Definition

- Designed and facilitated the session to **define and plan an institution-wide strategic initiative** using an Inception Deck format: 10 hours across two days with a committee that had no prior exposure to participatory dynamics.
- Outcome: an agreed initiative statement, elevator pitch, workstreams with deliverables scored for effort and impact, a cost/value matrix and a **multi-year roadmap from the current quarter through 2029**.

MAR 2025

Industrial Multinational - Digital Division

Value Stream Mapping · Lean Portfolio Management

- Designed and facilitated the **Value Stream Mapping workshop** for the demand, approval and delivery process of the project portfolio: As-Is mapping, inefficiency identification and To-Be ideation.
- Delivered a **five-stage improvement proposal** (Strategy, Discover, Allocate, Develop, Grow) with target states, core activities and required competencies per stage, plus a practice catalogue graded across three effort levels so the organisation could choose its entry point.

2023 - AUG 2025

Insurance Company III

Operating Model · Metrics System · Enterprise Coaching

- Designed and guided the rollout of the **operating model for a Data Analytics Division** made up of 5 departments of 5 to 20 people each, **deployed in one month** and subsequently tailored to each department.
- Built and launched a **division- and team-level metrics system** on JIRA, Power BI and Confluence. Indicators improved by roughly **30% at launch** before settling at each department's steady-state level.
- Designed digital workspaces and published best-practice and lessons-learned documentation.

DETAIL

2021 - 2023

Insurance Company II

Kanban · Agile Leadership · Flow Metrics

- Rolled out a **Kanban system across Infrastructure & Operations**: 6 to 8 teams of 4 to 8 people. First-ever flow metrics measurement for the area, which made it possible to **define realistic, data-based SLAs** instead of inherited commitments.
- Ran workshops with the teams to define workflow, team agreements and digital workspaces.
- Built in-house tools for the professional and collective development of the area: Time Thief, Team Health and Role Galaxy.
- Coached the **Technology area managers** on agile leadership practices and skills: how to create a thriving environment for self-managed teams, and how to provide enough structure without falling into micromanagement.

2019 - 2021

Insurance Company I

Organisational Transformation · Cultural Change

- Study of extrinsic motivations across the whole IT organisation to uncover levers for improving the working environment, starting from a low Great Place to Work score.
- Rolled out an Agile/Scrum-oriented organisational model starting with **4 development initiatives**, mentoring Scrum Masters and Product Owners and training the teams.
- Proposed a coordination and scaling model with delivery flow metrics.
- Identified and launched **6 cultural change initiatives** led by the HR Division.

Banking

Assessment of 4 initiatives through interviews across a broad cross-section of the organisation, delivering an improvement roadmap and a reorganisation proposal geared towards value delivery.

Mobile Telecoms

Mentoring of the digital area's Product Owners and the agile area's Agile Coaches through a Learning-by-doing programme.

Cement Technology

Design and co-facilitation of STATIK (Systems Thinking Approach To Introduce Kanban) sessions across 3 teams.

DETAIL

Electricity Grid

Mentoring of the Financial Services team with STATIK, taking it to maturity level ML3 – Fit for Purpose.

Legal Information Publisher

Mentoring of Product Owners through a Learning-by-doing workshop programme.

Oil & Gas

Coaching of the Agile area and rollout of a bespoke product-oriented model within the Digital Product Factory: training for product leaders, a product map to measure rollout progress and maturity, and DevOps-oriented metrics.

Kairos DS Communities

Contributor to the Agile capability's training community and, since 2026, driver of the internal AI group: MVP of a conversational assessment of consultants' AI proficiency (Gemini + Google Workspace + Looker Studio), evaluation of internal training and experimentation with agentic tools and systems.

Experience at Other Companies

JUN 2018 - NOV 2018

Agile Coach - Sngular

Team coaching · PSK · Organizational coaching

External Agile Coach at a bank undergoing transformation under a Spotify model. Embedded in a tribe split into squads as Trainer-Mentor and Coach-Facilitator, determining which techniques to apply in each team to raise the organisation's overall maturity.

JUN 2016 - JAN 2017

Product Owner Elenko - BBVA

Product Ownership · Inception Facilitation · Story Mapping

Elenko, a BBVA-powered web app focused on Asset Management. Involved from the inception of a new fintech and the definition of a robo-advisor for fund portfolios and pension plans, including due diligence of partner FNZ. As Product Owner: definition of digital onboarding, support operations and MIFID questionnaires.

MAR 2014 - MAY 2016

Project Manager / Product Owner Wizzo - BBVA

Team coaching · Conflict management · Scrum

Wizzo, the first BBVA-powered app aimed at the millennial segment. Project manager for the BackOffice tool with an offshore team; then Scrum Master of the Technical Support, Customer Care and QA teams, **reaching 90% customer satisfaction**. Finally Project Manager and Product Owner of Wizzo 1.0, handing over the experience and features to Wallet, the BBVA app and the customer service centre, and executing the first controlled shutdown of an app with no reputational risk to the brand. **Team of 14 to 26 people.**

OCT 2007 - MAR 2014

COBOL, CICS, DB2, HOST Analyst - BBVA

COBOL · DB2 · JCL · Nemesis · MicroStrategy

Customer & People (2011-2014). Evolution and maintenance of the Customer & People infrastructure, adapting its services to new regulatory requirements and the digitalisation strategy, and designing the developments that supported the acquisition of new banks (UNIM Project).

Operational Infrastructure (2007-2011). Analysis and design of the data architecture for the Product & Service Catalogue and the Contract Conditions Infrastructure, under ITIL methodology.

Early Career

IRDB Consulting (2007) · Risk functional analyst for a bank: scoring application and resolution of external audit findings. **Atos** (2003-2007) · Analyst in the Project Management Office and Risk systems analyst with PACBASE on mainframe, building the Risk Data Warehouse for Basel compliance. **Petróleos de Venezuela S.A.** (1994-2003) · Progression from mail services to Accounts Payable Analyst: over 200 external creditors and a team of 8.
